Education

- Vellore Institute Of Technology**, BTech in Computer Science (Data Science) – Vellore July 2023 – present
- CGPA : 9.30 / 10.00
- Achyuta Public School, CBSE**, Highschool in Bio-Mat – Dindigul, TN, India June 2017 – Apr 2023
- Grade: AISSCE: 89.6% , AISSE: 98%

Projects

- Intelligent Media Lifecycle Manager (Python/Rust)** Jan 2025 – present
- Architected a high-performance CLI tool to organize and deduplicate massive media archives using Python and Rust.
- Engineered a CLI tool with Rust-accelerated Perceptual Hashing (pHash) to detect visual duplicates robust to edits and resizing.
 - Implemented a journaled transaction system that logs file operations to JSON, enabling atomic execution and complete state rollback/undo.

Experience

- AI-ML Intern**, Tata Consultancy Services - TCS – Chennai, TN, India June 2026 – Aug 2026
- SAP Analytics Cloud Intern**, Blueprint Technologies Pvt Ltd – Bengaluru, KA, India May 2025 – July 2025
- Worked in core analytics concepts including exploratory data analysis, data cleaning, and responsive dashboards in SAP Analytics Cloud advanced dimension-level calculations, enhancing user interactivity and analytical depth.
 - Integrated live data from Google Drive and implemented time-based metrics, enabling real-time performance monitoring for trend analysis and resolved geo-mapping issues by debugging latitude-longitude ID conflicts.
 - Worked on predictive modeling (linear regression, classification, time series)
- AI-ML , Intern**, Jol Energy – Vellore, TN, India Aug 2025 – Nov 2025
- Developed a real-time facial expression analyzer in Python using OpenCV to capture and process live webcam video.
 - Integrated a Hugging Face (PyTorch) model to perform face detection and emotion classification, achieving real-time inference.
 - Engineered an UI to overlay bounding boxes, label emotions, confidence scores, and controls to save frames and verbose logging.

Awards

- Winner - Roboverse Ideathon 2025, IEEE Robotics and Automation Society, VIT, Vellore** Jan 2025
- Designed an AI-driven surveillance system using YOLO (Ultralytics) for real-time anomaly detection in CCTV footage.
 - Developed a working prototype with human movement tracking, anomaly detection, and automated logging.
 - Showcased scalable crime prevention potential with automated monitoring, securityalerts, and behavioral analysis.

Skills

Programming: Python, Java, C, C + + , Bash, YAML, HTML, CSS, JavaScript

Operating System: Arch Linux, Windows

Software: SAP Analytics Cloud, Excel, Sheets, Git Version Control, AWS Architecture

Language: English (Professional proficiency), Tamil (Native proficiency), Japanese & Hindi (Limited proficiency)

Courses & Certifications

- AWS Certified Solutions Architect – Associate** Dec 2025 – Dec 2028
- Microsoft Certified: Azure AI Engineer Associate - AI 102** Nov 2025 – Nov 2026
- Microsoft Certified: Azure Data Fundamentals - DP 900** Oct 2025
